## Assessment of the Capability and Intention of ANTIFA and BLM to Conduct Unconventional Warfare Against The Government of the United States

Dear Friends, as we approach Election Day and the prospect (prayers for this please) of another Donald Trump victory we should take the Left's threats of violence seriously.

Recently, there was an article from Natural News circulated, that made some claims that seemed outlandish, Trump winning the popular vote for example, and it also made claims about post-election violence which on their face are hard to believe, but which contain kernels of truth as explained below.

To refresh, you can read the article here <u>https://www.naturalnews.com/2020-10-29-total-war-is-coming-to-america-after-biden-is-defeated.html</u>

First, the claims:

Democrat puppet masters are leaning toward their nuclear option.

This option is a "Zero Day" attack on America's infrastructure. This attack is likely to include:

- Mortar attacks on police stations and fire stations (China has supplied BLM terrorists with 60mm mortars)
- Kinetic attacks on power grid substations and power generation plants (to plunge the nation into Joe Biden's "Dark Winter")
- Violent uprisings in the streets, where Leftists deploy firearms and bombs to start mass killing conservatives and Trump supporters
- Door-to-door executions of Trump supporters, conservative news reporters and Christian leaders
- Bombings of government buildings with high explosives (C-4)
- Shutting down national transportation by fire bombing bridges and roadways while sabotaging rail lines nationwide
- Cyber-attacks on hospitals, government offices and telecommunications infrastructure

The result would be the plunging of America into chaos and civil war,

Sound crazy? YES, however, when we look behind those claims many of them are actions ANTIFA and BLM have the clear intention to undertake, and for which they are actively seeking and testing the capabilities necessary to be successful.

Consider the following:

## ANTIFA regularly uses "mortars" to attack police stations and other

targets, <u>https://ktvz.com/top-stories/2020/08/10/portland-rioters-set-fires-use-mortar-2-officers-hurt/</u> These are not the mortars we all know from WWII movies where the guy drops a little bomb down a tube and covers his ears <u>https://youtu.be/18NTmtS6V28</u> they are commercial grade fireworks made in China and capable of delivering a substantial incendiary payload into a building, <u>https://www.skysongfireworks.com/product-category/professional-fireworks/display-shells/</u> or being modified as anti-personnel bombs with components easily and legally obtained online. <u>https://www.wired.com/2011/07/diy-fireworks/</u>

ANTIFA and BLM have already killed several conservatives, most recently Lee Keltner in Denver, and their riots regularly include cadres armed with firearms and explosives <a href="https://www.kptv.com/news/doi-18-year-old-arson-suspect-arrested-for-throwing-explosive-device-at-portland-courthouse/article\_3aac312c-d397-11ea-a087-4b48795bf159.html">https://www.kptv.com/news/doi-18-year-old-arson-suspect-arrested-for-throwing-explosive-device-at-portland-courthouse/article\_3aac312c-d397-11ea-a087-4b48795bf159.html</a> and <a href="https://nypost.com/2020/10/13/owner-says-portland-restaurant-was-shot-at-for-being-pro-police/">https://nypost.com/2020/10/13/owner-says-portland-restaurant-was-shot-at-for-being-pro-police/</a>

While we have no evidence that ANTIFA or BLM have obtained military grade explosives (C4), explosives regularly show up during their actions, most recently as part of ATM robberies conducted during riots in Philadelphia. These may be opportunistic criminality or they may be part of funding schemes for local ANTIFA cells <u>https://abcnews.go.com/US/charged-explosives-found-van-amid-unrest-philadelphia-black/story?id=73919058</u>

We know that ANTIFA and BLM recruit or at least attract people with serious violent criminal backgrounds as shock troops - all three of the individuals shot by Kyle Rittenhouse in Kenosha had violent felony charges or convictions, as did <u>Michael Forest Reinoehl</u>, the ANTIFA trooper who killed Patriot Prayer member Aaron "Jay" Danielson in Portland - they have the intention and the capability to kill.

They have created, posted and widely disseminated a means of identifying Trump supporters and other perceived enemies and they have now shown a willingness to move out of commercial and government centers into residential areas. So far most of these violent intrusions into neighborhoods have been random expressions of violence, but with the means of identifying targets at the tap of a smartphone app they have the intention and capability of targeting Trump supporters and conservatives for violence or death. <u>https://www.kgw.com/article/news/local/police-declare-riot-during-protest-in-</u> northeast-portland/283-98f65b12-16c5-43e6-857d-2b199c1da408

While we don't yet have any evidence of ANTIFA or BLM cyber or physical attacks on hospitals, power stations or similar infrastructure, there have been numerous instances of ANTIFA and BLM blocking streets, roads and interstate highways. Recently they blocked the I-395 tunnel in DC <u>https://www.wusa9.com/article/news/local/protests/protesters-block-i-395-monday-morning/65-7188334b-d4bb-428e-ba06-b0d44da52024</u> While a number of hospitals and government agencies have been targeted by cyber attackers recently, no evidence indicating an

## ANTIFA or BLM connection has been released.

https://www.nbcnews.com/tech/security/cyberattack-hits-major-u-s-hospital-systemn1241254

That being said, we do know that unstable individuals, and eco-terrorist groups allied with ANTIFA, have attacked energy infrastructure <u>https://thehill.com/opinion/energy-environment/366713-more-eco-terrorist-attacks-on-energy-infrastructure-on-tap-for and https://money.cnn.com/2015/10/16/technology/sniper-power-grid/index.html and https://stopfossilfuels.org/electric-grid/shooting-transformers-disables-substations/</u>

Finally, we do know that BLM has trained with foreign terrorist organizations, including PFLP see my 2015 article, *Connecting the Dots Between Jerusalem and Ferguson* <u>http://www.conservativehq.com/article/21377-connecting-dots-between-jerusalem-and-ferguson</u> and that Mandarin-speakers have shown-up on the front lines of riots in Lafayette Park, among other places. That Communist China and Iran would benefit from chaos in America is a given.

## What's the bottom line?

In the aftermath of the election no doubt we will see a lot of unfounded claims, conspiracy theories and downright craziness come from outsider sources. But just because the source is outside the mainstream doesn't mean we should not evaluate the information in terms of the capability and intention of our opponents to conduct unconventional warfare against us and the legitimate government of the United States. When we do that, we often find these outsider sources contain kernels of useful information and prescient warning of future action by our enemies.

**CHQ Editor George Rasley** is a certified rifle and pistol instructor, a Glock <sup>®</sup> certified pistol armorer and a veteran of over 300 political campaigns, including every Republican presidential campaign from 1976 to 2008. A member of American MENSA, he served on the staff of Vice President Dan Quayle, as Director of Policy and Communication for former Congressman Adam Putnam (FL-12) then Vice Chairman of the Oversight and Government Reform Committee's Subcommittee on National Security and Foreign Affairs, and as spokesman for retiring Rep. Mac Thornberry, former-Chairman of the House Armed Services Committee.
