POWER DISTRIBUTION & QUALITY

YOUR GO-TO PARTNER

BEING THE FULL LINE TO YOUR ONE-LINE

POWER DISTRIBUTION

Employee safety and infrastructure performance begins with properly engineered power distribution systems that are maintained throughout the system's life cycle. From the substation to the plant floor, industrial end users recognize that proper project design, execution, and life cycle support are critical.

Consultants, project engineers and maintenance staffs utilize Rexel's technical teams and supply chain services to optimize cost of ownership. Industrial end users leverage Rexel's vast network of quality suppliers for successful project implementation covering a variety of disciplines. Let Rexel be the "Full Line to Your One Line!"

DESIGN

Product experts and project teams help create specifications and design projects to meet the emerging integration of control, power and information.

EXECUTE

Project execution is critical to your success. Rexel's dedicated project managers coordinate across the supply chain - speeding project execution & ensuring quality performance.

SERVICE

Understanding the needs of your company will allow for a customized solution from our services team. Let Rexel Power Services maximize your lifecycle investments.
