

A large oil pumpjack is the central focus, silhouetted against a vibrant sunset sky with orange and yellow hues. The sun is low on the horizon, creating a strong backlight effect. In the background, other oil rig structures are visible, and the foreground shows a fenced-in industrial area.

Rexel Oil & Gas

As production costs continue to increase, we've made it a priority to develop effective solutions for the oil and gas industry. From upstream exploration and production facilities in offshore, conventional fields and oil sands to downstream refineries throughout the United States, Rexel is your partner of choice.

Our investments in logistics, productivity and convenience services help keep our oil and gas customers operating at peak capacity. Most importantly, our dedicated team of seasoned electrical professionals are a phone call away to support you with everything from routine maintenance, repair and construction to help with emergencies that can spring up 24/7.

As a full-line electrical products and services distributor, our goal is to become an extension of your business and provide you with a single point of access to a world of solutions.

Solutions and Services

- Inventory Management & EDI Solutions
- Product Rationalization
- NEC & IEC Compliant Products
- Training & Technical Education
- Reporting Capabilities
- Lighting & Energy Audits
- Lower Total Cost of Ownership (TCO)
- Local Delivery + Worldwide Logistics
- Cable Management & Assemblies

Solutions and Services

Inventory Management & EDI Solutions

Our on-site inventory management services significantly reduce overnight freight costs and out-of-stock inventory and ensure we deliver the right product at the right time. Plus, our wide array of Electronic Data Interchange (EDI) formats can enable your company to further increase its productivity. By sending your orders in electronic format, Rexel can send you an electronic invoice that will enable you to reduce your processing costs.

Product Rationalization

When new technologies are introduced into the market they often replace existing, outdated products that you have in inventory. This leads to clutter, redundancy and waste. We can seamlessly direct you to the latest technologies and help you phase out old product.

NEC & IEC Compliant Products

Make Rexel your first choice for all your application needs. We have a worldwide footprint and access to manufacturers around the world. From ANSI to ATEX, conduit to cable, UL to GOST. Take advantage of our global resources for all of your applications.

Training & Technical Education

Our branch offices are equipped to coordinate in-house and on-site training for you and your staff. In most cases, we will coordinate a certified instructor, earning your staff Continuing Education Credits. Let us work with you to develop a training program to cover the products and services most critical to your facility.

Reporting Capabilities

Drill into your purchases by facility, manufacturer or part number with our professional and timely reports customized to your needs. Reports can be run weekly, monthly, quarterly and annually. Use our reports in conjunction with inventory rationalization to keep a tight grip on your purchasing dollars.

Lighting & Energy Audits

Refinery, offshore platform or compressor station — whatever your facility — Rexel can perform a comprehensive lighting audit, coordinate all rebates and incentives, and deliver the safest and most energy efficient solutions.

Lower Total Cost of Ownership (TCO)

Reduce operating expenses by understanding your Total Cost of Ownership. We examine your application, the cost associated with backup materials, production efficiencies, downtime and maintenance costs to identify areas for beneficial process modifications.

Local Delivery + Worldwide Logistics

Most Rexel locations deliver within a 100 mile radius and will work around your schedule for drop offs. We accommodate large projects with on-site inventory using a job site trailer, synced with our inventory management system for quick and easy replenishment.

CABLE MANAGEMENT & ASSEMBLIES

Rexel cable management capabilities include a wide array of options that can be catered to our specific needs. At our cable depot location in Houston and across our national branch network, we stock a broad range of wire and cable for onshore and offshore exploration and production environments. We are the leading and largest supplier of General Cable IEEE 1580 Type P, E and X cables in the US. In addition Rexel can supply Welded Corrugated Aluminum Molded cables for MC-HL applications, IEC NEK 606 and IEC 92-3 cables, and all types of communication cables that meet global industry demands. Rexel's value-added cable services include:

- Cable optimization procedures to reduce scrap and minimize overruns
- Cable cutting and spooling to your specific project requirements
- Tagging and kitting services catered to satisfy unique job-site logistical needs
- Flexible pricing programs to help you manage your costs as copper fluctuates
- Design and specification assistance to aid you in cable standardization
- Cable assemblies built and tested to your specifications, including service loops and cable disconnects

Product Offering

Automation

- Distribution I/O & Terminal Blocks
- Human Machine Interface
- Motion Control
- Programmable Logic Controllers
- Programmable Relays
- Pushbuttons, Selector Switches, & Indication Devices
- Sensors
- Software & SCADA
- Telemetry & RTU's
- Training and Engineering

Distribution Switchgear

- Circuit Breakers
- Distribution Panels
- Fuse Panels
- Load Break Switches
- Load Centers
- Power Conditioning/UPS
- Power Supplies
- Safety Disconnects
- Transfer Switches

Engineered Equipment & Assemblies

- Power Distribution Centers (E-House or PCR Buildings)
- Meter Station/Buildings
- Power Transformers – Pad Mount/ Sub-Station Class
- Custom Control (PLC) Panels
- LV MCC's & MCC Replacement Units
- MV/LV Engineered Assemblies
- MV/LV Cables & Termination Kits
- Project Management, Planning & Control
- Well-pad energy recovery and management solutions
- Financing options and management of tax credits and utility rebates

Enclosures & Accessories

- 304 & 316 Stainless Steel
- Cast Aluminum & Non-metallic
- All NEMA Types including Explosion-Proof and ATEX
- Enclosure Assemblies
- Glands, IEC & NEC
- Panel-Mount Meters & Devices
- Terminals & Lugs

Lighting

- Control & Contactors
- Emergency & Egress Lighting
- Fluorescent & HID
- Hazardous Area Lighting
- IEC/ATEX Compliant
- Industrial High-Bays & Low-Bays
- Lamps, All Types
- LED & Induction Solutions
- Replacement Ballasts

Installation & Maintenance

- Cold Shrink Tubing
- Flex, Sealtight, Rigid, EMT, PVC Conduit
- Fittings & Cable Tray
- Fuses & Accessories
- Tapes & Insulating Products
- Terminations, Splices, & Motor Lead Kits
- Wiring Devices & Boxes
- Wire Management
- Wire Markers

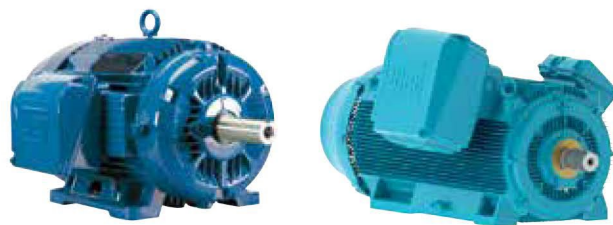

Motor Control

- Combination Starters
- Contactors & Motor Disconnects
- Emergency Stops & Foot Switches
- Motor Circuit Breakers
- Relays, Timers, Counters & Clocks
- Soft Starters
- Variable Speed Drives

Motors & Generators

- AC & DC Motors
- Controls
- Explosion Proof Motors
- Fractional Motors
- Gas, Diesel & Bi-Fuel
- Gearsets
- Generators
- High Efficiency Motors
- Transfer Switches
- Temporary & Permanent

Plugs & Receptacles

- 30/60/100/150/200/400 Amp
- Color-Coded Single Pole Receptacles & Connectors
- Communication, Ethernet, & Power Links
- Delayed Action & Mechanically Interlocked Receptacles
- Fiber Optic Connectors

Safety, Signaling & Monitoring

- Audible Signals
- Fire Alarms
- Industrial Cameras
- Initialing
- Intercoms/Paging
- Lock-Out Tag-Out Markers
- Public Address
- Safety Interlocks
- Telephony
- Visual Signals

Specialized Cables

- Assemblies & Service Loops
- Cable Cutting, Management & Optimization
- Data & Communications
- Fiber Optic
- Instrumentation
- Power & Control
- Medium-Voltage
- Unarmored, SWA & Metal-Clad
- Variable Frequency Drive Cables

Tools & Test Equipment

- Cable Testers
- Calibration Instruments
- Clamp Meters
- Digital Multimeters
- Electrical Hand Tools
- Electrical Test Tools
- Insulation Testers
- Products for Holmaking, Conduit Bending, Fishing & Cable Pulling
- Thermal Imaging

We Have Answers

Whether you're looking to improve production efficiency, manage critical inventory or trying to maximize workplace safety, the dedicated Oil and Gas team at your local Rexel location is standing by to help with custom solutions tailored to your environment — be it an offshore platform, refinery or compressor station.

We Understand the Oil and Gas Industry.

Rexel's oil and gas solutions specialists have the experience and talent necessary to work effectively and safely with your teams to increase plant efficiency and deliver optimal energy use. From quick product and project turnarounds to ongoing maintenance and operational support, we have delivered exceptional performance to producers and refiners all over the U.S.

Because we are not a manufacturer you will get unbiased recommendations tailored to your unique environments and budget. No pressure, just smartly coordinated, forward looking, product solutions and advice.

We're a Supplier and a Partner.

From assistance with product rationalization and logistics to installation and our on-site inventory management services, when you work with Rexel you not only have access to a world of electrical and datacom products, you also get a valuable partner in your business. We'll help prioritize and manage new construction, ongoing maintenance and repair projects to get the best bang for your buck with minimal disruption to operations.

We're with you every step of the way.

With value added services including project management, technical training, detailed reporting, total cost of ownership analysis, lighting & energy audits and more, you can't find a better partner — no matter where your work takes you — we're *The People you Know with the Power to Deliver.*SM
