

Rexel

**AUTOMATION
SOLUTIONS**

Are computer and network security challenges affecting your plant performance?

Take advantage of Rexel's OT Network, Computer & Support Services. Our Network Professionals can help you optimize your plant-floor networks and industrial computers.

ASK YOURSELF

- Is your network performance impacting your modernization efforts?
 - Do you know your most significant cyber threats, and are you addressing them?
 - Are you vulnerable to third-party applications hosted on your network?
 - Are you looking for a comprehensive path forward to data analytics?
-

WE HAVE THE EXPERIENCE TO HELP

Customers can count on Rexel's expertise for consultation, assistance, and support. Our experience includes intelligent device implementation, network architecture design, network security, logical device implementation, and software driven data analytics.

Our team of Network Professionals is certified to perform complimentary, customized OT services.

Trust the network experts at Rexel.
