Panel Modifications Done Your Way

Ready made panel modifications can help to streamline your manufacturing process.

ASK YOURSELF

- Are you spending too much time modifying enclosures to meet your specifications?
- Are you challenged with time constraints to get your product to market?
- Would you like to allocate your workforce to higher priorities in your process?
- Are you experiencing long lead times for custom enclosure modifications?
- Could pre-populated control panels help with your speed to market challenges?

REXEL

**AUTOMATION
SOLUTIONS**

Quality Modifications With Confidence

Increase overall operating effectiveness.

Improve your speed to market.

Save valuable plant-floor space.

Reduce operational costs.

Benefits of a Rexel Modification Center

Increase Speed to Market

With Rexel's JIT delivery of custom enclosures and sub-assemblies.

Streamline Your Procurement

By consolidating entire Bill of Materials into one part number.

Allocate Your Resources

Towards higher priority manufacturing processes.

Lower Inventory Costs

By reducing stocking levels of components on pre-populated panels.

Conserve Floor Space

With less square footage dedicated to enclosure modifications.
