

WIRE HANDLING SOLUTIONS

We support customers across the country with large local inventories, productivity tools and dedicated solutions specialists to get them the electrical, lighting and automation supplies they need. Our services and solutions are flexible with the goal of increasing productivity and the overall delivered cost of the project. For more information on how these value-added solutions can work for you, contact your local branch.

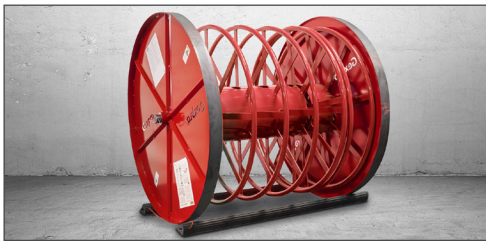

WEMCO REEL

Allows for paralleling of multiple cables onto master reel from reel rack - three, four, or five compartment systems are offered. For movement around a job site, a stand with wheels is available.

PULLING HEADS

Reduce set-up time, eliminate waste, and experience cost & labor savings with no cutting, stripping, or weaving of wire to make pulling heads.

EZ REEL

Enables one person to safely maneuver a 5,000 lb. reel on flat jobsite surfaces with no reel jacks required and a turn radius of 360 degrees. With wheel chocks installed, pay directly from the reel at the feed point and use a shortened center shaft to easily change the system to a narrow design for applications with limited space. Compatible with Wemco paralleling systems.

MATERIAL CARTS

Material handling carts efficiently and securely deliver the material you need – when and where you need it – reducing wasted time, improving efficiency and saving money. Each cart has large industrial casters, is lockable, and made of steel mesh to provide full visibility. When you’re ready, we deliver fully stocked carts directly to your site – organized to your specifications and ready for install.

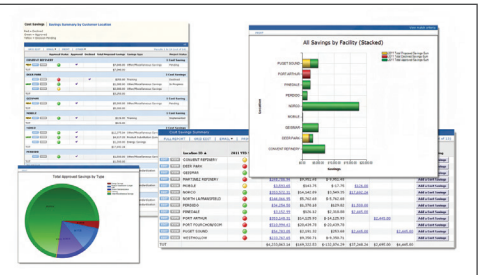

STAGE & SHIP

We act as your “agent” by receiving, inspecting and staging materials at our location. Then we ship precisely what you need to your jobsite based on your release schedule. Experienced project managers work with your staff to ensure your project runs smoothly with JIT deliveries. Excellent for lighting fixtures & controls, fittings & boxes, conduit & wire, and much more.

KITTING

Streamline ordering, receiving and dispersal with kits that pack and group your material to your precise specifications in our warehouse. Reduce costs by way of installation, transactions, warehouse space, and inventory with custom kitting. Kits are created based on customer BOMs and include individually labeled parts and master packing lists.

COST-SAVINGS TRACKER

Your costs are more than the price you pay, 80% of your cost to do business is tied to procurement, receiving, handling, warehousing, assembly and other non-product related activities. Our team can lead you in the right direction and document the savings. Our web-based Intelligence Tool collects data, tracks savings, shares information and generates real-time reports. It tracks savings opportunities against realized, proven results to uncover even greater savings.
