## KITTING

### PRE-PACKAGED PRODUCTIVITY SAVINGS

Standard shipments arrive at the jobsite in mixed parcels, which means you have to break down and organize the material before beginning an installation. With Kitting, project-specific kits of material arrive at the jobsite, neatly partitioned, pre-assembled, and ready for installation so your workers spend time installing, not hunting for material.

### HOW IT WORKS

- You provide the specs
- We package products together for installation
- Kits are delivered to your jobsite ready-to-install

### FEATURES

- Entire BOM can be shipped against one PO
- Products labeled per your specifications
- Rexel can maintain safety stock, replacements and spares
- Kitted material is easily moved to where its needed on the job site
- Ability to order multiple items as a single part number

### HOW YOU SAVE

- Reduces inventory costs
- Fewer PO's and invoices
- Decreased leakage and shortages
- Improved labor efficiency
- Frees up warehouse space
- Simplified material management
