## A Single Source for Your Safety Needs.

Rexel offers Safety Assessment Services to evaluate plant risk and help you make well informed decisions to support the safety of your employees.

## What to Expect

- ### 1 Conformity Audits

A plant-wide machine audit provides a safety analysis of machine conformity in guarding and safety functions. Lockout/tagout devices are identified and labeled, Machines are prioritized for further assessment
- ### 2 Guarding Evaluation

Provides a rapid approach to identifying point-of operation and power transmission hazards and identifying appropriate and effective safeguarding measures for reducing risk and exposure.
- ### 3 Risk Assessments

Our Safety Experts provide an analysis identifying primary hazards/tasks and recommendations for safety improvements such as protective guarding, electrical safety controls, pneumatic/fluid power safety controls, and safety circuit performance.
