Administrator Dashboard Available

E-Learning Courses

Global library consisting of over 20 courses across 6 automation technologies including motion, drives, control, visualization and networking. New courses are continually being added.

Virtual Classroom Sessions

Include modularized virtual lectures, lab experience demonstrations, simulations and demonstration videos. Office hours are available for small group coaching to enhance learning concepts.

Accessibility

Easy to access training is available on any tablet or PC using Chrome, Safari, IE, Edge or Firefox. All content is narrated and has a viewable transcript.
