REXEL | AUTOMATION SOLUTIONS

CYBERSECURITY SOLUTIONS

When it comes to your business's success technology should be a tool not a problem

With OT and IT converging, the line between digital and physical infrastructure becomes increasingly blurred, leaving industrial manufacturers vulnerable to cyberattacks. As a result, network security has become one of today's most critical risk management strategies for manufacturers.

Adopting a Proactive Cybersecurity Stance

Based on the NIST cybersecurity Framework, our best-in-class approach provides both IT and OT solutions to cover the entire attack continuum – before, during, and after an event. Paired with our deep expertise in production operations, Rexel's comprehensive services deliver complete visibility, control, and assurance across all network areas to enable continuous, always-on protection.
