

LEVEL 0 TRAINING: MICRO800 & PANELVIEW 800

Training for programmable logic controller systems and graphic terminals

Automation Training

Micro800 & PanelView 800 hands-on training

Join Rexel for a full day of training that will help you reduce costs and improve machine assembly time. Hardware for this course includes a Micro800 PLC and a PanelView 800 HMI. **Each attendee will leave with more than \$1,500 in hardware.** This is a one-day hands-on workshop is focused on Micro800 controller system using the Connected Components Workbench (CCW) software for applications that require flexible communications and greater input/output (I/O) capability.

Pre-registration is required and seating is limited.

\$1,100 per student

Agenda

9:00 a.m. - 12:00 p.m. Session Focus Micro800

- Micro800 & PanelView 800 overview
- CCW 11 updates
- Launching CCW
- Creating new project (Micro800)
- Starting a program in Ladder Logic
- Pushbuttons (Timers, scaling, & counters)
- Downloading to a controller

12:00 p.m. - 1:00 p.m. Lunch Served

1:00 p.m. - 3:00 p.m. Session Focus PanelView 800

- Adding PanelView 800 to a project
- Basic configuration and initialization
- Adding screens (Display timer, linking tags, pushbuttons)
- Downloading to HMI

Date & Location

Thursday, October 10th

9:00 a.m. - 3:00 p.m.

32 Haigis Pkwy

Scarborough, ME 04074
