

## Frequently Asked Questions

### 1. What types of energy resources does FactoryTalk® Energy Manager™ support?

FactoryTalk® Energy Manager™ supports electric (voltage, current, etc.) and non-electric resources (natural gas, water, steam, compressed air, etc.). It provides a comprehensive view of all energy used in your operations.

### 2. How does FactoryTalk® Energy Manager™ help with emissions tracking and reporting?

The software allows you to monitor and report on Scope 1 and Scope 2 emissions. Based on energy consumption, it calculates carbon intensity and total emissions, aiding in sustainability efforts and regulatory compliance.

### 3. Can I see real-time energy data?

Yes, the platform offers real-time data acquisition and monitoring. This empowers you to identify energy waste, optimize processes, and respond quickly to changing conditions.

### 4. How does FactoryTalk® Energy Manager™ help me understand the relationship between energy consumption and production?

The software contextualizes energy data with operational technology (OT) data. This allows you to track energy intensity (energy used per unit of output) and emissions intensity, gaining insights into your operations' efficiency.

## 5. What if I don't have coding skills? Can I still analyze energy data?

Absolutely! FactoryTalk® Energy Manager™ features charting and no-code analytics capabilities. You can perform on-the-fly trending, analysis, and troubleshooting without coding expertise.

## 6. Is FactoryTalk® Energy Manager™ suitable for single and multi-site operations?

Yes, the software is designed to be scalable, accommodating single-site, multi-site, and even enterprise-level energy management needs.

## 7. How quickly can I get started with FactoryTalk® Energy Manager™?

FactoryTalk® Energy Manager™ offers faster time-to-value compared to traditional on-premises software. You can be up and running quickly with minimal disruption to your operations.

## 8. Can FactoryTalk® Energy Manager™ integrate with my existing systems?

The platform seamlessly integrates with various data sources, including Rockwell automation systems, third-party devices, and databases, ensuring a holistic view of your energy data.

## 9. How does FactoryTalk® Energy Manager™ help me save on energy costs?

By providing real-time insights, identifying waste, and enabling optimization, FactoryTalk® Energy Manager™ helps you make informed decisions that lead to significant energy cost savings.

## 10. What are the future capabilities planned for FactoryTalk® Energy Manager™?

The development roadmap includes energy performance and emissions prediction, anomaly detection, and advanced energy optimization. These enhancements will further empower you to achieve your energy and sustainability goals.
