Issue Highlights

- i-Sense® Voltage Monitor
- PowerFlex® 6000T
- Allen-Bradley® Stratix® 5200
- FactoryTalk Analytics™ GuardianAI™
- Learning+ Training Subscription Announcement
- Rexel Tech Tour is Coming to Baltimore, MD
- 2024 Workforce Development

You Sense There Is a Problem. Now You Can See It.

Voltage sags are responsible for a significant amount of unplanned downtime. i-Sense technology is cost-effective, easy to use, easy to install and virtually maintenance-free. Once installed, the i-Sense transmits your incoming power quality event data to i-Grid® servers via an Ethernet or modem connection.

A detailed sample report is available to you for evaluation! Please reach out to your account manager or local Rockwell Automation Components Specialist to see one today.

PowerFlex® 6000T

- **NEW: Permanent magnet motor support**
 - PowerFlex® 6000T drives now support permanent magnet motors for higher efficiency operations through the lifecycle. Applications up to 120 Hz output frequency
 - PM motors expand into oil & gas, HVAC, pulp & paper and forestry -- and help meet energy efficiency and sustainability goals
- **Additional predictive maintenance alerts**
 - TotalFORCE® technology expands to set new predictive alerts for transformers, air flow, motor and machine bearings and lubrication
- **Reduce cybersecurity risk**
- **Space-saving solution**
 - The secondary pre-charge support is housed in the existing footprint to make offering compact and economical

Use existing devices as sensors.

Get more insights out of your existing equipment data.

No data science required.

Empower your OT professionals with easy-to-use machine learning.

Advance from anomaly detection to identification.

Minimize investigation time with context about the type of failure that is going to occur.

Analyze at the edge.

Train and run right at the edge for near real time predictions.
