FRONTIER

THE FUTURE OF INDUSTRIAL AUTOMATION

Discover, Learn, and Innovate at the Rexel Tech Tour!

The Rexel Tech Tour is coming to markets across the U.S., offering automation leaders an exciting, one-day event packed with opportunities to shape the future of industrial operations. Connect with over 200 problem solvers, makers, and leading manufacturer partners as you explore cutting-edge technologies, gain insights from instructor-led trainings, and collaborate with peers. Don't miss the Rexel Tech Tour—where innovation meets action.

Automation Innovations

Enhance Safety, Productivity, and Peace of Mind

Proxxi by Grace is revolutionizing workplace safety with its groundbreaking wearable voltage-detecting wristband, companion app, and dashboard. Designed to provide real-time alerts to

workers approaching live voltage, Proxxi adds an essential layer of protection when the unexpected occurs—helping prevent injuries and fatalities in high-risk environments.

Proxxi empowers teams to identify risks early, improve compliance, and create safer workplaces through data-driven insights. This market-first innovation is setting a new standard for electrical hazard awareness—because safety should never be left to chance.

Be on the lookout for the wristbands on your local Rexel teams!

Hardy HI5069-WS Series: Precision Weight Modules for CompactLogix™ Systems

Engineered for seamless integration with Rockwell Automation® CompactLogix 5380 controllers, the Hardy HI5069-WS Series deliver high-performance weighing capabilities directly to the PLC backplane. Acting as a co-processor, these modules provide post-processed, filtered weight data at an impressive rate of 250 updates per second. Featuring a powerful 24-bit sigma-delta (Σ - Δ) analog-to-digital converter and Hardy's WEVERSAVER® filtering technology, these modules are ideal for engineers seeking reliable, high-speed weighing solutions for demanding process control systems.

Secure Your Operational Technology Environments with Fortinet

Traditional IT security measures fall short in protecting critical Operational Technology (OT) environments. Standard and ruggedized Next-Generation Firewalls (NGFWs) provide the deep inspection and granular segmentation needed to mitigate risks to industrial control systems and SCADA systems. Learn how NGFWs help to secure OT environments and what to

FORTINET

consider when selecting a NGFW with this checklist.

5 Considerations For OT Firewalls

Intelligent, predictive fault-tolerant computing

Using ztC Endurance enables digital transformation of computing infrastructure to modernize operations and deploy advanced software stacks, ensuring application availability and data integrity at the edge or data center. The platform combines built-in fault tolerance, proactive health monitoring, and serviceability by OT or IT, along with meeting cybersecurity requirements.

Discover The ztC Endurance Platform

Transform the Way You Manage Industrial Alerts

SmartSights has integrated its Peer issue management accelerator with WIN-911 alert notifications. This connection keeps industrial teams informed from alert to resolution, ensuring critical operational issues are addressed promptly. With Peer & WIN-911, your team can do more than just acknowledge alerts—you can take decisive action that minimizes downtime and drives continuous improvement.

M100 Electronic Motor Starter - Innovation Simplified

The M100 Electronic Motor Starter delivers smooth startups and overload protection to enhance efficiency and extend equipment lifespan. With a compact design and adherence to SIL 3 PLe safety standards, it simplifies wiring, reduces complexity, and prioritizes reliability in critical applications. **Now available at select Rexel locations!**

Advanced Touch Screen Technology

Elevate operational accuracy on your plant floor with precise touchpoint identification on your HMI. PanelView™ 5510 graphic terminals now feature projected capacitive touch technology (PCAP) which offers higher sensitivity and easier touch operation than standard touch screens, even for gloved users.

Read to Simply Your Maintenance Strategy?

Effective maintenance isn't about quick fixes—it's about having the right tools to ensure long-term reliability and performance. Fiix, our CMMS platform of choice, goes beyond software by serving as a centralized hub for maintenance data. With Rexel's industry expertise, consulting, and implementation support, your team can unlock Fiix's full potential, turning maintenance operations into a powerful driver of lasting results.
