- 2025 Workforce Development

Product Showcase

EtherNet/IP In-cabinet Solution

The EtherNet/IP In-cabinet Solution is a cost-effective gateway connecting traditionally hard-wired components, enabling seamless data connectivity and enhanced efficiency in modern control panel designs. This solution provides a secure infrastructure to access identity, state, runtime, and maintenance information from devices in the control panel. The EtherNet/IP in-cabinet system eliminates control wiring, reduces panel space requirements, and reduces commissioning efforts.

Advantages of an EtherNet/IP in-cabinet system include:

- Reduced engineering and testing time
- Single cable with power and data with the use of the 1486-CBL flat media cable
- Plug and play (PnP) installation which eliminates control and module power wiring
- Up to 10% reduction in cabinet size
- Fully integrated with Logix Designer/Studio 5000®
- Enhanced productivity/reduced downtime with device-level diagnostics and data

Now available for use with 100-E/104-E contactors and 22mm 800F panel operators.

"Basics" Courses

Rexel offers a number of "Basics" courses designed for those who would like to learn more about each of the topics. These should be considered introductory courses, and cover terminologies, hardware, and programming where appropriate. They can be done in our Sparks office, onsite at our customer's facilities, or at a third-party venue if required.

- **Logix Basics**
 - Learn the basic of PLC configuration using Logix controllers and Studio 5000.
- **CCW Basics**
 - Learn the basic of CCW software with a Micro 820 controller and a PV800.
- **Basics of Electricity**
 - Learn the basic of electricity, using meters, and its practical applications in an industrial plant
- **HMI Basics**
 - Learn the basics of FactoryTalk View ME software and working with the PVP7
- **Drive Basics**
 - Learn the basics of applying, installing, and programming VFDs.

STOBER's Revolutionary Servo Motor Safety Brake

STOBER

STOBER's servo gearboxes can be paired with our ServoStop, an integrated safety brake. It's ideal for vertical applications and provides redundant braking. It prevents slipping or falls, even when the motor is removed.

Coming Soon - PointMax™ I/O Modules

The PointMax™ I/O architecture provides a wide range of input and output modules to span many applications, such as machine, hybrid, and process control. The architecture uses Producer/Consumer technology that allows input information and output status to be shared among multiple Logix 5000® controllers. PointMax™ I/O systems are used as remote I/O modules with Logix 5000 controllers. You configure the modules with the Studio 5000 Logix Designer® application.

Space optimization features for maximum design freedom include:

- Single-slot safety module reduces the control panel size
- No more calculations for module power simplifies I/O configurations
- Field power feeding through the backplane eliminates the need for an extra Field Potential Distributor (FPD) module

PointMax I/O platform enables manufacturers to design more efficient, compact machines while simplifying deployment and maintenance.

LifeCycle Services

Build Knowledge and Expertise

Want more information? Ask your authorized Allen-Bradley® distributor which **Learning+ training subscription** is right for you, or visit: rok.auto/training Copyright ©

Our E-learning courses include fundamental and product-specific topics delivered directly to your plant floor or location of your choice. Each learning module contains activities, software simulations and demonstration videos to help reinforce learning concepts. Virtual classroom sessions include modularized virtual lectures, lab experience demonstrations, simulations and demonstration videos.

Office hours are available for small group coaching to enhance learning concepts. More capabilities and more content. Live and on-demand Genius Webinars are featured monthly, and content is continuously being developed. Assessment tools help baseline your knowledge and e-learning modules are available in multiple languages.

For questions, please contact
Bryan.Wenner@RexelUSA.com.

Upskill your employees with flexible, on-demand training solutions

You're challenged to provide your current workforce with the technical skills and knowledge that will keep your production environment operating smoothly. Our Learning+ training subscription provides the valuable instruction that you need, with today's flexible workforce requirements in mind.

Expanded training options now available
