Issue Highlights

- **Tech Tour 2025 | Asheville, NC | August 14, 2025 | 9:00am - 3:00pm**
- 1694 Modular Electronic Circuit Protectors
- Softing Extends Connectivity Solutions With usbLink CN, Replacing the Discontinued Allen-Bradley 1784-U2CN
- OptixEdge™
- LifeCycle Services
- 2025 Workforce Development

Join us for our 2025 Tech Tour and open house event showcasing innovations in modern manufacturing. Meet our team of dedicated automation specialists and engage with over 12 leading industry partners. Dive deep into our keynote sessions and explore the newest innovations showcased on our showfloor. This is a local 1-day event you don't want to miss! For questions or more information, please contact Jason.McBrayer@RexelUSA.com.

Product Showcase

1694 Modular Electronic Circuit Protectors

Our modular Bulletin 1694 Electronic Circuit Protectors protect the secondary circuits of 24V DC switch mode power supply against short circuit or overload. IO-Link enabled versions provide real-time insight into the status of your control system. The only 12.5 mm wide modules can be mounted side by side no further accessories required. They come with time-saving push-in terminals. The protection modules are available in single or double channel in the same compact housing. The range comprise fixed current ratings from 1A...10A and an adjustable current version.

By choosing IO-Link enabled versions of Bulletin 1694 Electronic Circuit Protectors and Power Modules, you can provide real-time current and voltage levels for any protection channel to your control system. This means you can get early insight to when values are trending out of normal ranges and possible intervene before a fault shuts your process down. IO-Link communications enable remote reset or range adjustment of circuit protection modules.

- Offers certified NEC Class 2 circuits [1A..4A]
- Provides LED indicator which turns yellow and provides a visual warning when load reaches 90 percent of current rating of protection channel
- Offers Push-in terminals that help reduce wiring time
- Helps protect both wiring and loads
- Allows easy side by side mounting – no accessories required
- Mounts on DIN-rails

New! OptixEdge™

OptixEdge™ Advanced Edge Gateway provides an integrated solution for manufacturers requiring remote access and data collection. Utilizing FactoryTalk Optix, users can collect, analyze, and push data through the cloud. It also functions as a gateway for FactoryTalk Remote Access, allowing users to program, configure, and troubleshoot over a secure VPN connection.

LifeCycle Services

Build Knowledge and Expertise

Want more information? Ask your authorized Allen-Bradley® distributor which **Learning+ training subscription** is right for you, or visit: rok.auto/trainingCopyright ©

Our E-learning courses include fundamental and product-specific topics delivered directly to your plant floor or location of your choice. Each learning module contains activities, software simulations and demonstration videos to help reinforce learning concepts. Virtual classroom sessions include modularized virtual lectures, lab experience demonstrations, simulations and demonstration videos.

Office hours are available for small group coaching to enhance learning concepts. More capabilities and more content. Live and on-demand Genius Webinars are featured monthly, and content is continuously being developed. Assessment tools help baseline your knowledge and e-learning modules are available in multiple languages.

Upskill your employees
with **flexible, on-demand** training solutions

You're challenged to provide your current workforce with the technical skills and knowledge that will keep your production environment operating smoothly. Our Learning+ training subscription provides the valuable instruction that you need, with today's flexible workforce requirements in mind.

Expanded training options now available

	Learning+	Learning+ Essential	Learning+ Smart Skills	Learning+ Plus
