Product Showcase

140G2 Molded Case Breakers

The 140G2 Molded Case Breakers are the next level of protection in molded case circuit breakers building upon the existing 140G MCCB. With the new “Electronic Sense” trip unit and it’s built in screen, users not only get 14 different circuit protections, but the measurements below. The built in screen allows users to make selections for adjustments, view waveforms, charts, and an event log.

FactoryTalk® Motion Analyzer Release 6.0

Optimize your machine performance with our modern motion design software.

To remain competitive in today's demanding business landscape, your machines must be operating at their full potential. FactoryTalk® Motion Analyzer software is designed to maximize the performance of your motion system before purchasing or installing physical equipment.

Discover how you can deliver breakthrough machine designs by selecting, analyzing, optimizing and validating your motion systems using powerful, easy to visualize motion data.

New in Release 6.0

- Reusable Components
- Project and Component Sharing
- Super Review - Detail Review
- Bulk Project Import/Export

Ready to Start Building, Sizing and Selecting? Download the *free* FactoryTalk® Motion Analyzer software using your MyRockwell login credentials.

For questions, please contact Cliff.Gilliland@RexelUSA.com.

ASEM™ 6300PA Series

ASEM™ 6300PA On-Machine™ industrial PCs save time, space, and installation cost. With a **fanless** design and the ability to operate in a **wide ambient temperature range**, these PCs are built to deliver years of reliable operation. These ultra-modern industrial PCs offer flexible mounting options, allowing machine designers to place the PC in the ideal location. These PCs can be further customized with optional accessories including handles, keyboard trays and a special panel for push buttons, selector switches and other input devices

FT Optix™ OPTIONAL

RVL 100mm OPTIONAL

LifeCycle Services

Build Knowledge and Expertise

Want more information? Ask your authorized Allen-Bradley® distributor which **Learning+ training subscription** is right for you, or visit: rok.auto/training

Our E-learning courses include fundamental and product-specific topics delivered directly to your plant floor or location of your choice. Each learning module contains activities, software simulations and demonstration videos to help reinforce learning concepts. Virtual classroom sessions include modularized virtual lectures, lab experience demonstrations, simulations and demonstration videos.

Office hours are available for small group coaching to enhance learning concepts. More capabilities and more content. Live and on-demand Genius Webinars are featured monthly, and content is continuously being developed.

Upskill your employees with flexible, on-demand training solutions

You're challenged to provide your current workforce with the technical skills and knowledge that will keep your production environment operating smoothly. Our Learning+ training subscription provides the valuable instruction that you need, with today's flexible workforce requirements in mind.

Expanded training options now available

	Knowledge	Knowledge Enhancement	Learning Craft Skills	Learning Plus
USER ACCESS				
40+ automation courses	✓	✓	✓	✓
Virtual instructor-led training	✓	✓	✓	✓
Webinars of industrial craft skill courses	✓	✓	✓	✓
Genius Webinars	✓	✓	✓	✓
Product spotlight micro-courses	✓	✓	✓	✓
Automated technology knowledge assessments	✓	✓	✓	✓
ADDITIONAL FEATURES				
Certificate of completion for a Learning+ course	✓	✓	✓	✓
Administrative dashboard for multi-users	✓	✓	✓	✓
Real-time monitoring of user access	✓	✓	✓	✓
ON-DEMAND OPTIONS				
Annual subscription	✓	✓	✓	✓
Single course 90-day trial pass	✓	✓	✓	✓
Educational subscriptions	✓	✓	✓	✓

Assessment tools help baseline your knowledge and e-learning modules are available in multiple languages.

INTRODUCING:

[DRV215 - PowerFlex 750-Series Configuration, Startup, Maintenance, and Troubleshooting](#)

This course is a combination of CCA182 - PowerFlex 750-Series Configuration and Startup and CCA183 - PowerFlex 750-Series Maintenance and Troubleshooting delivered as a three-day in-person class. Upon completion of this course, given a wired PowerFlex® 750-Series drive (PowerFlex 753 or PowerFlex 755) and AC motor, you will be able to install the drive correctly, start it up, and configure drive parameters to meet application-specific needs. The course also introduces concepts and techniques that will assist you in successfully maintaining and troubleshooting the drive, recognizing PowerFlex 750-Series drive hardware, and diagnosing specific faults.
