

Electrical Worker Training – Electrical and Arc Flash Safety

Safety First, Confidence Always!

Protecting your people starts with the right training. Eaton's Electrical and Arc Flash Safety class empowers workers to recognize and avoid energized hazards while staying compliant with the latest safety standards. Grounded in NFPA 70E and OSHA 29 CFR 1910, this course teaches how to minimize risk when exposure to live equipment is unavoidable. From hazard awareness to real-world procedures, you'll gain the knowledge to meet regulatory requirements and the confidence to lead safely in any environment. Don't miss this opportunity to enhance your professional capabilities and make a significant impact in your workplace!

General Information

Training Domain: Electrical Safety & Compliance

Class Duration: 8 Hrs.

Credits: 0.8 CEU

Delivery Methods: In Person

Cost: \$925 per attendee

Class Locations and Times:

March 18, 2026 / 8 AM to 4:30 PM / Rexel Sacramento-1534 North Market Blvd, Sacramento

May 20, 2026 / 8 AM to 4:30 PM / Rexel Santa Clara-540 Martin Ave, Santa Clara

Course Description

At completion of this course, students will be able to avoid working on or near energized equipment. Where exposure cannot be avoided, students will learn to implement safety procedures to minimize dangers adhering to the guidelines of NFPA 70E.

Course Topics

- Working safely on or around energized electrical equipment
- Temporary grounding
- Protective grounding equipment
- Working in a situation where an arc-flash or shock hazard exists
- Selecting and using personal protective equipment and insulated tools
