

ELECTRICAL & ARC FLASH SAFETY

PROFESSIONAL TRAINING

Protecting your people starts with the right training. Eaton's Electrical and Arc Flash Safety class, grounded in NFPA 70E and OSHA 29 CFR 1910, teaches teams to recognize energized hazards, stay compliant, and reduce risk when live exposure can't be avoided. Join Rexel & Eaton to gain practical procedures and the confidence to lead safely. Complimentary lunch will be provided.

YOU'LL LEARN

- Working safely on or around energized electrical equipment
- Temporary grounding
- Protective grounding equipment
- Working in a situation where an arc-flash or shock hazard exists
- Selecting and using personal protective equipment and insulated tools
