

# Automated Disaster Recovery

## Event Summary

Join us for an informative training session on OT Disaster Recovery, where we will explore the importance of automatic backups for critical infrastructure and reliable control system recovery. Learn how our solutions seamlessly integrate into your existing IT disaster recovery policies, ensuring efficient system recovery, minimizing downtime from device failures, and providing alerts for configuration discrepancies.

Don't miss this opportunity to enhance your organization's resilience and operational continuity! Presented and supported by your local Rexel team.
