## MAXIMIZE THE CAPABILITIES OF YOUR AUTOMATION SYSTEMS

Friday, April 17th • 8:00 AM - 4:00 PM

Hyatt Regency Del Monte Golf Course

1 Old Golf Course Rd  
Monterey, CA 93940

Register Now

### Technical Sessions & Tradeshow

Each year, Rexel Tech Tour hosts more than 200 problem solvers, makers and leaders who are shaping the future of industrial operations. This one-day event provides unparalleled opportunities for learning, inspiration and connections. Dive deep into training from knowledge experts on the latest technology advancements and explore the newest innovations showcased across an expansive showfloor with over 20 of Rexel's leading manufacturer partners. Lunch included.

### Topics & Industries

- **Increase** production and operational performance by modernizing your control technologies
- **Enhance** workforce skills and efficiencies with continual training and resources
- **Leverage** data from your existing machines for faster, more accurate decision-making
- Industry Solutions for **Food & Beverage, Water/Wastewater, Machine Builders, Energy, & more**

1 Day • 10 Technical Sessions • 3 Hands-On Labs • 24 Technology Partners

### Featured Partners

## SESSION SCHEDULE

See Reverse Side For Session Descriptions. All Sessions Are 50 Minutes. Labs are 1 Hour. \*Lab seating is limited.

	BEACH ROOM	PACIFIC ROOM	GROVE ROOM (LABS)
9AM	What's New. What's Next. What Matters.	Automated Disaster Recovery w/ AssetCentre	FactoryTalk Optix: Creating Your First HMI Project
10AM	-	-	-
11AM	AI-Powered Vision: Smarter Quality & Throughput	Expanding the Integrated Architecture	FactoryTalk AssetCentre Basics
12PM	-	-	-
1PM	Energy Strategy for Manufacturing: Save Costs, Improve Resilience	VFD Best Practices & Modernizations	Studio 5000 Logix Designer w/ FactoryTalk Logix Echo
2PM	Power Reliability & Quality	-	-
3PM	AI Agents: Turn Industrial Data into Decisions—Faster. Smarter.	Protecting OT Environments w/ Network Segmentation	Integrating Safety Devices into Your OT System

Trade Show Floor • 8:00AM – 4:00PM

Lunch Served • 12:00PM

SESSION DESCRIPTIONS

## What's New. What's Next. What Matters.

**9:00AM – 10:00AM**

Discover the latest enhancements in Controllers, IO, Visualization and In Cabinet solutions. Get a clear view of new capabilities, performance improvements, and how these updates can drive smarter, more connected operations with improved lifecycles.

## AI-Powered Vision: Smarter Quality & Throughput

**11:00AM – 12:00PM**

FactoryTalk VisionAI brings artificial intelligence directly to industrial vision systems, enabling faster, more accurate inspection without the complexity of traditional rule-based vision. By learning from real production data, VisionAI helps manufacturers detect defects earlier, adapt to variation, and improve quality with confidence.

## Energy Strategy for Manufacturing: Save Costs, Improve Resilience

**1:00PM – 2:00PM**

A practical session on securing long-term energy certainty for manufacturing amid rising demand. Learn integrated procurement and onsite solutions to cut costs, lower risk, and boost sustainability, plus clear next steps for a tailored plan that protects your budget and ensures reliable clean capacity.

## Power Reliability & Quality

**2:00PM – 3:00PM**

Learn practical strategies for reducing downtime and uncovering energy savings through coordinated surge protection, NEC-aware electrical practices, and power quality diagnostics. Actionable guidance and examples tailored to food processing and water/wastewater operations.

## AI Agents: Turn Industrial Data into Decisions—Faster. Smarter.

**3:00PM – 4:00PM**

Discover how AI-driven Industrial DataOps and Engineering Copilots are transforming the way teams design, operate, and optimize industrial systems. Learn how AI can break down data silos, accelerate engineering workflows, and support smarter decisions across the lifecycle—from design and commissioning to operations and maintenance.

## Automated Disaster Recovery w/ AssetCentre

**9:00AM – 10:00AM**

Explore Rockwell Automation's AssetCentre, a leading solution for centralized asset management and disaster recovery. Learn how it secures intellectual property with version control, automates PAC backups, and delivers detailed audit trails to support compliance and rapid troubleshooting.

## Expanding the Integrated Architecture

**11:00AM – 12:00PM**

Join us to discover how Rockwell Automation's Logix platform is transforming industrial automation. Learn how its unified approach, combining On-Machine solutions, Robotics, and Intelligent Conveyance, helps you deploy faster, connect systems easily, and scale confidently for modern manufacturing.

## VFD Best Practices & Modernizations

**1:00PM – 2:00PM**

Explore best practices for VFD drive system design and installation, along with the evolution of drive technology, key applications, and practical considerations for planning and executing drive modernization.

## Protecting OT Environments w/ Network Segmentation

**3:00PM – 4:00PM**

As OT environments adopt more IT-based devices and applications, they create new pathways for cyber criminals to target critical production systems. Learn how network segmentation can secure resources, systems, and users while reducing the risk of attackers accessing critical infrastructure.

## FT Optix: Creating Your First HMI Project Lab

**9:00AM – 10:30AM**

FactoryTalk Optix software is a new platform which includes features such as multi-user collaboration, web-based design and test, and integrated version control. Create your first HMI project using Rockwell Automations open HMI platform. Gain hands-on experience while learning to navigate and identify key components within the environment.

## FT AssetCentre Basics Lab

**11:00AM – 12:00PM**

Learn about the core functionality of FactoryTalk AssetCentre in a hands-on lab environment. You will learn how to interact with the FactoryTalk AssetCentre Desktop and Web Client applications, gain an understanding the product's basic functionality, as well as how to design the foundation of a successful asset management system.

## Studio 5000 Logix Designer w/ FT Logix Echo Lab

**1:00PM – 2:00PM**

Studio 5000 Logix Designer / Logix controller hands-on training with no HW needed. Although run in virtual environment, the experience is identical to training run with physical Logix hardware thanks to the next generation emulator FactorTalk Logix Echo.

## Integrating Safety Devices into Your OT System

**3:00PM – 4:00PM**

Learn how AI can break down data silos, accelerate engineering workflows, and support smarter decisions across the lifecycle—from design and commissioning to operations and maintenance.
