Issue Highlights

- **Save The Date:** Automation Fair 2026 | Boston, MA | November 16 - 19, 2026
- Critical Infrastructure Advisory
- Guardmaster® Safety Relays
- PowerFlex 6000 Portfolio
- LifeCycle Services
- 2026 Workforce Development

Save The Date! Join The Rexel Experience at Automation Fair® 2026.

We are excited to invite you to attend the 2026 Automation Fair® event, hosted by Rockwell Automation **November 16 - 19, in Boston, MA**. Learn more about the Rexel Experience below. Our complete customer travel package includes our stay at the **The Boston Marriott Longwharf** and an exciting customer event at **New Balance The Track**.

Critical Infrastructure Advisory

On April 7 2026, the Cybersecurity and Infrastructure Security Agency (CISA), issued Cybersecurity Advisory AA26-097A warning of active and ongoing malicious targeting of industrial control systems (ICS), used in water and wastewater operations/critical infrastructures. Based on this advisory, prompt action is strongly advised to reduce exposure and determine whether your systems may be at risk.

CISA recommends asset owners take the following steps as soon as possible:

- Remove PLCs from direct internet exposure. Ensure PLCs are not directly accessible from the internet. Use secure gateways, firewalls, and proper network segmentation.
- Review logs for indicators of compromise (IOCs). Query all available logs using the IOCs referenced in the advisory and applicable timeframes.
- Monitor for suspicious OT traffic. Review logs for unusual or unauthorized traffic on OT-related ports, including 44818, 2222, 102, and 502, particularly traffic originating from overseas hosting providers.
- For Rockwell Automation devices, place the physical mode switch is set to RUN to prevent unauthorized logic changes.

Need assistance? Rexel can help you; Create and maintain secure connections and remote access. Reduce risk from aging systems, especially where components are no longer supported. Strengthen long-term security & resilience helping you to have a clear view of what's connected across your environment and where potential risks exist.

Product Showcase

Guardmaster® Safety Relays

Rockwell Automation's Guardmaster® single-function safety relays are designed to meet functional safety standards, such as ISO 13849-1 or IEC 62061, and they offer key functions to simplify installation and system complexity. In addition, information gathered from the GSR intelligent safety relays via the optional EtherNet/IP Interface helps minimize unplanned downtime, increase efficiencies, and enable The Connected Enterprise®.

[Learn More](#)

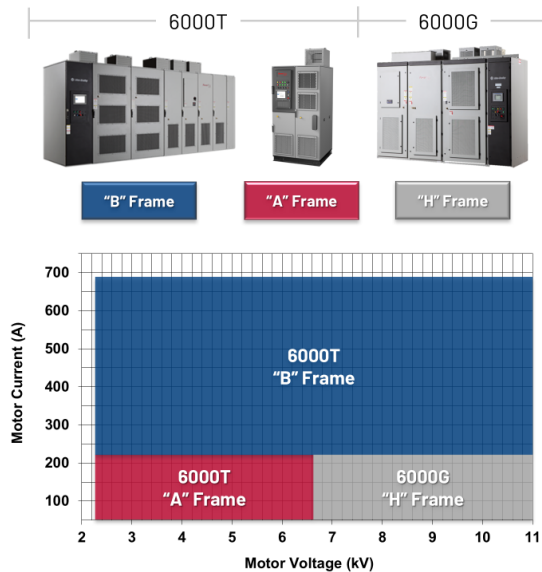

The Guardmaster Dual GuardLink Safety Relay further extends this capability to even share diagnostics and status information of safety switches and safety sensors connected in series via GuardLink.

- Offers a broad range of safety functions
- Provides versatility through simple logic, reset and timing configurations
- Includes single wire safety relay connection which allows for ease of installation and system flexibility
- Terminals are grouped together by power inputs and outputs for clear connection
- Offers compact solution which saves energy and space on DIN rail
- Provides consistent terminal layouts and configuration allow simplified installation
- Offers an optional Guardmaster EtherNet/IP Network Interface (440R-ENETR) that allows Guardmaster Safety Relays to communicate on an EtherNet/IP network
- Includes the Guardmaster Dual GuardLink safety relay, which provides visibility of system status down to the individual guard doors and E-stops when used with GuardLink-enabled smart safety devices

For questions, please contact Kelly.Matthews@RexelUSA.com.

PowerFlex 6000 Portfolio

- All Purpose Medium Voltage Drive:
 - Ideally suited for non-regen applications
 - Up to 10 km motor cable length
- Global Standards Compliance
 - IEC (all voltages) / UL - available up to 6.9 kV
- Motor Voltage and Current Scope:
 - 6000T Versions:
 - "A" Frame - 2.4...4.16 kV, 0...215 A - Global
 - "A" Fram - 6...6.6 kV, 0...215 A - IEC
 - "B" Frame - 2.4 kV to 11 kV, 200...680 A - Global
 - 6000G Version:
 - "H" Frame - 6...11 kV, 0...200A - UL/IEC
- Service and support available globally
 - Regional spare part hubs

LifeCycle Services

Gain Lifecycle Support for your Assets through Asset+ Managed Service.

Asset+ is a managed service that provides you with a dedicated, on-site resource, supports your lifecycle management needs, and reduces overall costs. With this service, you will receive:

- Industry-leading warranty coverage on remanufacturing and repair services
- Recommendations on proper inventory levels for operations
- Improved sustainability with actionable insights on CO2e emissions, energy and waste
- Insights on lifecycle risk and obsolescence

Your Asset Management Professional is a dedicated resource to support asset management needs and accelerate your asset management and reliability maturity. The service is delivered by a Rockwell Automation Authorized Service Provider, Asset Management Professional, or Reliability professional resource who is on-site at your facility during established business hours

[Ways to receive lifecycle support for your assets with Asset+:](#)

Inventory Management: a managed service that includes a dedicated, on-site resource to deliver a comprehensive asset management program.

Repair+ Service Agreement: Simplified budgeting for all your repair services needs with predictable repair spend and additional buying power.

Please contact Amber.Manno@RexelUSA.com with inquiries.

Featured Learning

If Rockwell's in-person classes do not work for you, Rockwell offers their [Learning+](#) subscription program which has a wide variety of classes that are flexible and fully virtual.
