PanelView Pro HMI Platform

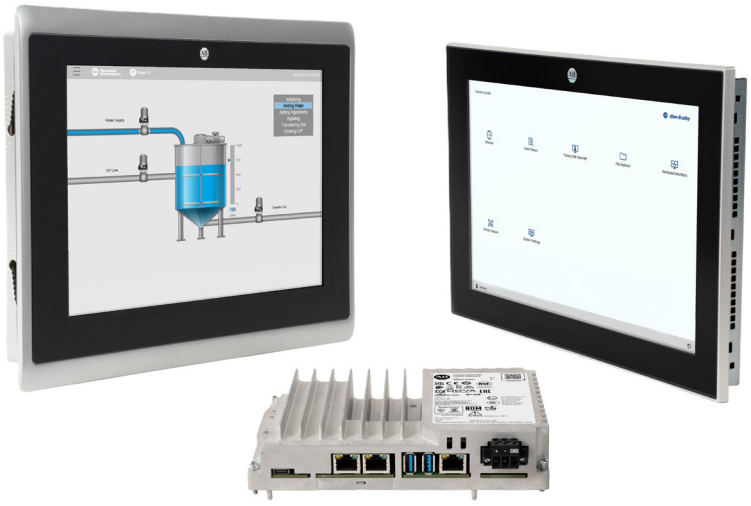

Low-touch modernization for existing HMI applications

PanelView™ Pro is a graphic terminal designed to help manufacturers modernize existing HMI systems with minimal disruption. Built to support FactoryTalk® View ME applications, it provides a clear migration path from PanelView™ Plus 7 while addressing the growing need for improved performance, cybersecurity, and lifecycle stability.

As legacy hardware reaches end of life and cybersecurity regulations increase pressure to upgrade, many customers face a difficult tradeoff between modernization and operational risk. PanelView Pro removes that barrier by enabling application reuse, maintaining existing panel cutouts, and simplifying serviceability through a modular design.

The result is a modern HMI platform that reduces downtime, lowers engineering effort, and extends the value of existing investments—while providing a clear path forward as systems evolve.

Key features and benefits

Modernize without disruption

- Low-touch migration from PanelView Plus 7 Performance systems
- Preserve FactoryTalk View ME applications
- Maintain existing panel cutouts to eliminate redesign
- Upgrade on your timeline while managing operational risk

Reduce complexity across the lifecycle

- Modular architecture with separate display and logic modules
- Replace only the component needed to minimize downtime
- Simplify spare parts management and service workflows
- Standardize across a unified hardware platform

Improve performance and operator experience

- Support larger, more complex applications with improved responsiveness
- High-resolution displays with multi-touch capability
- Modern hardware designed for evolving visualization needs

Allen-Bradley
by ROCKWELL AUTOMATION

Built for security and compliance

- Designed to meet evolving global cybersecurity requirements (CRA/MR)
- Managed operating system with long-term support
- Secure remote access enabled through FactoryTalk® Remote Access™
- Reduce risk across increasingly connected operations

Optimized for industrial applications

- **Modernization projects:** Upgrade legacy PanelView installations without redesign
- **Discrete manufacturing:** Maintain uptime with reliable, familiar HMI environments
- **OEM machines:** Standardize platforms while reducing engineering effort
- **Plant-wide rollout:** Scale consistent HMI hardware across sites

PanelView Pro Options

Available Calendar Year Q4 2026

Resistive Touch Terminals (6.5", 7" Wide, 10.4", 12.1" Wide, 15", 19") Includes 2900D Resistive Touch Display Module and 2900P PanelView Pro Logic Module

Coming in 2027

- **PanelView Pro Logic Modules** Modules with conformal coating option
- **Resistive Touch Display Modules** (6.5", 7" Wide, 10.4", 12.1" Wide, 15", 19") with brandless and conformal coating options
- **Capacitive Touch Display Modules** (7" Wide, 10.1" Wide, 12.1" Wide, 15.6" Wide, 18.5" Wide, 21.5" Wide, 24" Wide)
